

## GET ON AND GO

## PAY AS YOU GO, GO, GO!

Use the tag you already own, or pay by mail. No tag? Open a new TollTag account at [NTTA.org](http://NTTA.org) OR at the North Tarrant Express office and receive a \$5 toll credit, compliments of North Tarrant Express. Visit [NTETEXpress.com](http://NTETEXpress.com) and click on the (Get a \$5 Toll Credit) tab.

**Hop on and off** Clearly marked, dedicated ramps provide safe access on and off each TEXpress Lanes segment.

**Activate your HOV 50% discount** via the Drive On app 15 minutes before taking the TEXpress Lanes. Discounts are available when traveling with a passenger during peak hours.

**View the current toll rates** displayed on signs before each of the two tolling segments. You pay only the current rate displayed on the pricing sign before entering each TEXpress Lanes toll segment, even if the rate changes while you're driving.

The NTE TEXpress Lanes are comprised of two tolling segments. Separate charges will appear on your billing statement for each of the following toll segments:

**Toll Segment 1** runs from 35W to the Northeast Loop 820/Airport Freeway interchange, near North East Mall.

**Toll Segment 2** begins at the Northeast Loop 820/Airport Freeway interchange and extends to Industrial Boulevard.

Once you enter a toll segment, you will be charged. If you decide to continue to the next toll segment, you'll see a pricing sign for the second segment well in advance to help you determine whether to continue your trip on the TEXpress Lanes, or exit.

Tolls pay for the expansion and maintenance of not only the TEXpress Lanes, but also the free general highway lanes, frontage roads and bridges in the North Tarrant Express project.

Choose your lanes. A total of four NTE TEXpress Lanes, two in each direction, have been added to I-820. Along with four improved free lanes and four reconstructed frontage roads, two going in each direction, NTE offers drivers more choice and more moving.

Go with the flow. There are as many as 18 new or improved lanes to travel on. With two TEXpress Lanes, three free general highway lanes and two or three frontage road lanes in each direction, there is lots of room to go!

## BUT WAIT, THERE'S MORE!

NTE Mobility Partners and TxDOT are reconstructing a 10.1-mile stretch of I-35W from downtown Fort Worth to US 287. The I-35W corridor—a major north/south route for commuters and interstate trade—will feature fully rebuilt general highway lanes and frontage roads, along with two new TEXpress Lanes in each direction.

This project will relieve congestion and improve safety for anticipated traffic growth in one of the country's fastest developing regions.

**Stay tuned for the opening of Phase 1 of the 35W project in late 2016!**

## DON'T LET TRAFFIC CRAMP YOUR STYLE

TEXpress Lanes give drivers an escape from frustrating stop-and-go traffic. Lanes designed to keep traffic moving at a **minimum speed of 50 mph**, even during peak traffic times, are what you can expect on the NTE TEXpress Lanes located in the middle of Northeast Loop 820 and SH-121/183 Airport Freeway. Variable pricing—toll rates that fluctuate depending upon the traffic level and time of day—manages congestion. And congestion management never goes out of style.

## SEAMLESS CUSTOMER SERVICE AND DEDICATED ROADSIDE ASSISTANCE

Our partner, The North Texas Tollway Authority, takes care of all billing and customer service so drivers have a single point of contact for payment and questions. Visit [NTTA.org](http://NTTA.org).

### Need help jumping a dead battery or changing a flat in the North Tarrant Express corridor and NTE TEXpress Lanes?

Dedicated service vehicles staffed by our friendly, professional operations crew members can help you with any minor **roadside emergencies 24/7**.

**CALL NORTH TARRANT EXPRESS ROADSIDE ASSISTANCE AT 817.614.8706**

## EASY BREEZY

Clearly marked, dedicated ramps provide safe access on and off each TEXpress Lanes segment. Current toll rates displayed before each of the two tolling segments help you choose your travel plan. You pay only the **current rate displayed on the pricing sign** before entering each TEXpress Lanes toll segment, even if the rate changes while you're driving. And you can save using a TollTag, TxTag or EZ TAG, or pay by mail.

## ACCESSORIZE WITH YOUR TOLLTAG, YOUR DRIVE ON APP AND SAVE!

**TollTag users pay the lowest rates** and are eligible to register for the Drive On TEXpress app, whereas ZipCash pay-by-mail customers pay 50% more.

**The Drive On TEXpress app allows you to receive the HOV 50% discount** on NTE TEXpress tolls and other TEXpress Lanes in North Texas when traveling with passengers during peak hours.

**Solo drivers are also eligible to receive discounts** by participating in Drive On promotions. **Sign up at [DriveOnTEXpress.com](http://DriveOnTEXpress.com) and start saving.**

## WHAT'S SO FASHIONABLE ABOUT BEING... LATE?

*There's nothing glamorous about bumper-to-bumper traffic. Or the anxiety that comes with keeping one eye on the road and the other on the clock.*

Taking the NTE TEXpress Lanes means Dallas-Fort Worth commuters can get where they need to go without all the stress. Less congestion and predictable rates of speed are your choice when traveling one of the busiest highway corridors in Northeast Tarrant County. Take the improved general highway lanes on Northeast Loop 820 and SH-121/183 Airport Freeway or the TEXpress Lanes, which are designed to maintain a minimum of 50 mph during peak traffic, and you'll arrive fashionably early.
