ABOUT THE NORTH TARRANT EXPRESS

The \$2.1 billion North Tarrant Express project, which began in 2010 and was completed in October 2015, included the reconstruction of expanded frontage lanes and main lanes, as well as the addition of bypass lanes and TEXpress managed lanes along IH 820 and SH 121/183 between 35W in Fort Worth and Industrial Boulevard (FM 156) in Euless. This expansive reconstruction project is successfully alleviating traffic congestion along one of the busiest highway corridors in the North Texas and the state, with as many as 200,000 cars traveling the stretch daily.
